

RAZ4 Dimmer

Four Channel Dimmer Unit

Creates a cross fade of multiple colors and/or images. Four lights can be plugged into the dimmer unit and create fading or dissolving effects. A lighting chase can also be programmed for continuous looping.

Product Description: The RazTech four channel dimmer unit will dim and/or chase scenes automatically. The dimmer unit will create a cross fade affect for projection or wash lighting.

For example: Channel one and two could have projectors plugged into the dimmer unit and, channels three and four could have wash lights plugged into the dimmer unit. The effect would create a cross fade of color and projected images.

Each channel comes with two 3-prong Edison sockets, for a total of eight sockets. Each channel is equipped with a fuse for each channel, and a maximum output load of 10A per channel or 20A Total.

The dimmer unit has four buttons to program the unit as a stand-alone chaser/dimmer or a DMX dimmer pack. In DMX mode the dimmer can be controlled by a standard lighting console. In chaser/dimmer mode the unit can be programmed with 16 chase patterns. The chase speed, light intensity, and chase channel can also be programmed.
